Pertinent Art Cited

The following US Patent Applications reveal the current state of the art:

Takatsuka et al. (US 2004/0080491) teaches of a method for detecting movement of a moving substrate (fig. 4; placed on printed circuit board), comprising:

acquiring a first substantially sinusoidal signal (first signal from Hall effect device 11 at 0°; fig. 4) related to the position of said substrate (position of printed circuit board 14; fig. 1);

acquiring a second substantially sinusoidal signal (second signal from Hall effect device 11 at 90°; fig. 4) related to the position of said substrate that is substantially 90 degrees out of phase with the first substantially sinusoidal signal (fig. 4);

comparing the first substantially sinusoidal signal and the second substantially sinusoidal signal (differential amplifiers 2; par 0083, lines 12-19); and

converting the signal into a phase angle signal (par 0083, lines 20-21).

However, Takatsuka does not teach at least comparing the first substantially sinusoidal signal and the second substantially sinusoidal signal, selecting the signal with the lesser instantaneous magnitude as

Art Unit: 2863

the primary signal, selecting the signal with the greater instantaneous magnitude as the secondary signal, and producing a reference signal indicating whether the first substantially sinusoidal signal or the second substantially sinusoidal signal was selected as the primary signal.

Allowable Subject Matter

Claims 1-108 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for the allowance of claims 1 and 55 is the inclusion of the limitation "comparing the first substantially sinusoidal signal and the second substantially sinusoidal signal, selecting the signal with the lesser instantaneous magnitude as the primary signal, selecting the signal with the greater instantaneous magnitude as the secondary signal, and producing a reference signal indicating whether the first substantially sinusoidal signal or the second substantially sinusoidal signal was selected as the primary signal". The prior art of record, taken alone or in combination, fails to disclose or render obvious.

Claims 2-54 and 56-108 are allowed due to their dependency on claims 1 and 55.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
